| <b>Tests per Box:</b>     | 5                                                                                                                                                                                                                                                                                      |
| <b>Number of Strokes:</b> | n=1 for 1 -14 ppm<br>n=3 for 0.3 - 1 ppm                                                                                                                                                                                                                                               |
| <b>Time per Stroke:</b>   | 1.5 minutes                                                                                                                                                                                                                                                                            |
| <b>Discoloration:</b>     | Yellow → Pink                                                                                                                                                                                                                                                                          |
| <b>Shelf Life:</b>        | 1 year                                                                                                                                                                                                                                                                                 |
| <b>Applications/Use:</b>  | Vinylidene chloride is used as an intermediate for organic chemical synthesis. Vinylidene chloride is also used in the production of polyvinylidene chloride copolymers. The major application of these chloride copolymers is in the production of flexible films for food packaging. |
| <b>Availability:</b>      | In stock                                                                                                                                                                                                                                                                               |
